Professional Summary

Computer Science student and Software Engineer with experience in full stack development, Python automation, system integrations, and production data pipelines. Interested in AI engineering and AI harness engineering, with training in AI-assisted coding workflows. Experienced in investment banking and blockchain software environments, with a focus on reliable systems, developer experience, security, and scalability. Merit scholarship recipient with advanced English (C1).

Professional Experience

Software Engineer Intern | Parfin | Remote | March 2026 - September 2026

- Contribute to the company's software product stack, focusing on security, reliability, and developer experience.
- Develop and maintain smart contracts, primarily for EVM-compatible blockchains.
- Work with Solidity and smart contract development tools, including Hardhat and Ethers.js.

Automation Intern | BTG Pactual | August 2025 - November 2025

- Built automation solutions using Python, Pandas, and AWS to optimize financial workflows and data processing.
- Automated reports and system integrations, reducing manual operations and improving efficiency in a high-performance investment banking environment.
- Worked on system integration and data pipeline structuring in a production environment.

Education

Bachelor's Degree in Computer Science | PUC-Rio | 2025 - Present

Merit Scholarship Recipient | GPA: 8.2

Academic Minor in Data Science | PUC-Rio | In Progress

Additional academic domain focused on data, economic analysis, and analytical processes.

Technical Skills

Frontend: React, Next.js, Tailwind CSS

Backend: NestJS, Spring Boot, FastAPI

Desktop Development: Tauri, Rust

Cloud and Infrastructure: AWS, Hetzner, DigitalOcean, VPS

AI Development: AI-assisted coding workflows; Claude Code training

Automation and Data: Python, Pandas

UI/UX: Figma, Design Systems

Fundamentals: Data structures and algorithms, software architecture, security and scalability best practices

Additional Technologies: Solidity, Hardhat, Ethers.js, EVM-compatible networks

Courses and Certifications

Claude Code in Action | Anthropic — Practical use of AI-assisted coding tools and workflows.

Decentralized Finance (DeFi) Specialization | Duke University — Blockchain-based financial systems and decentralized finance fundamentals.

Understanding Stablecoins | Duke University — Design, mechanics, and role of stablecoins in the financial system.

Financial Management Specialization | Duke University — Financial concepts and tools for business performance evaluation.

Advanced English C1 | Cambridge | 2023 — Advanced academic and professional English proficiency.

DELE Spanish as a Foreign Language B2 | 2023 — Intermediate-advanced Spanish language proficiency.

English Course | Cultura Inglesa — Academic, professional, and conversational English.

Languages
